

How Drones Will Affect The Oil & Gas Industry

NACE Houston

11 August 2015

Landon Phillips, UAS Program Manager

Overview

- Background – What is a Drone?
- Technology and Applications
- Challenges
- The Future
- Q & A

What is a Drone?

- Many names
 - Unmanned Aerial Vehicle (UAV)
 - Unmanned Aerial System (UAS)
 - Remotely Piloted Vehicle (RPV)
 - Remotely Operated Aerial Vehicle (ROAV)
- Many sizes
 - Micro-Drones
 - Prosumer Drones
 - Commercial Drones
 - Military Drones

Background

- Rapidly developing industry
 - Estimated \$90B market
 - 100K jobs in next 10 years
- Highly regulated... for good reason

FAA Regulations

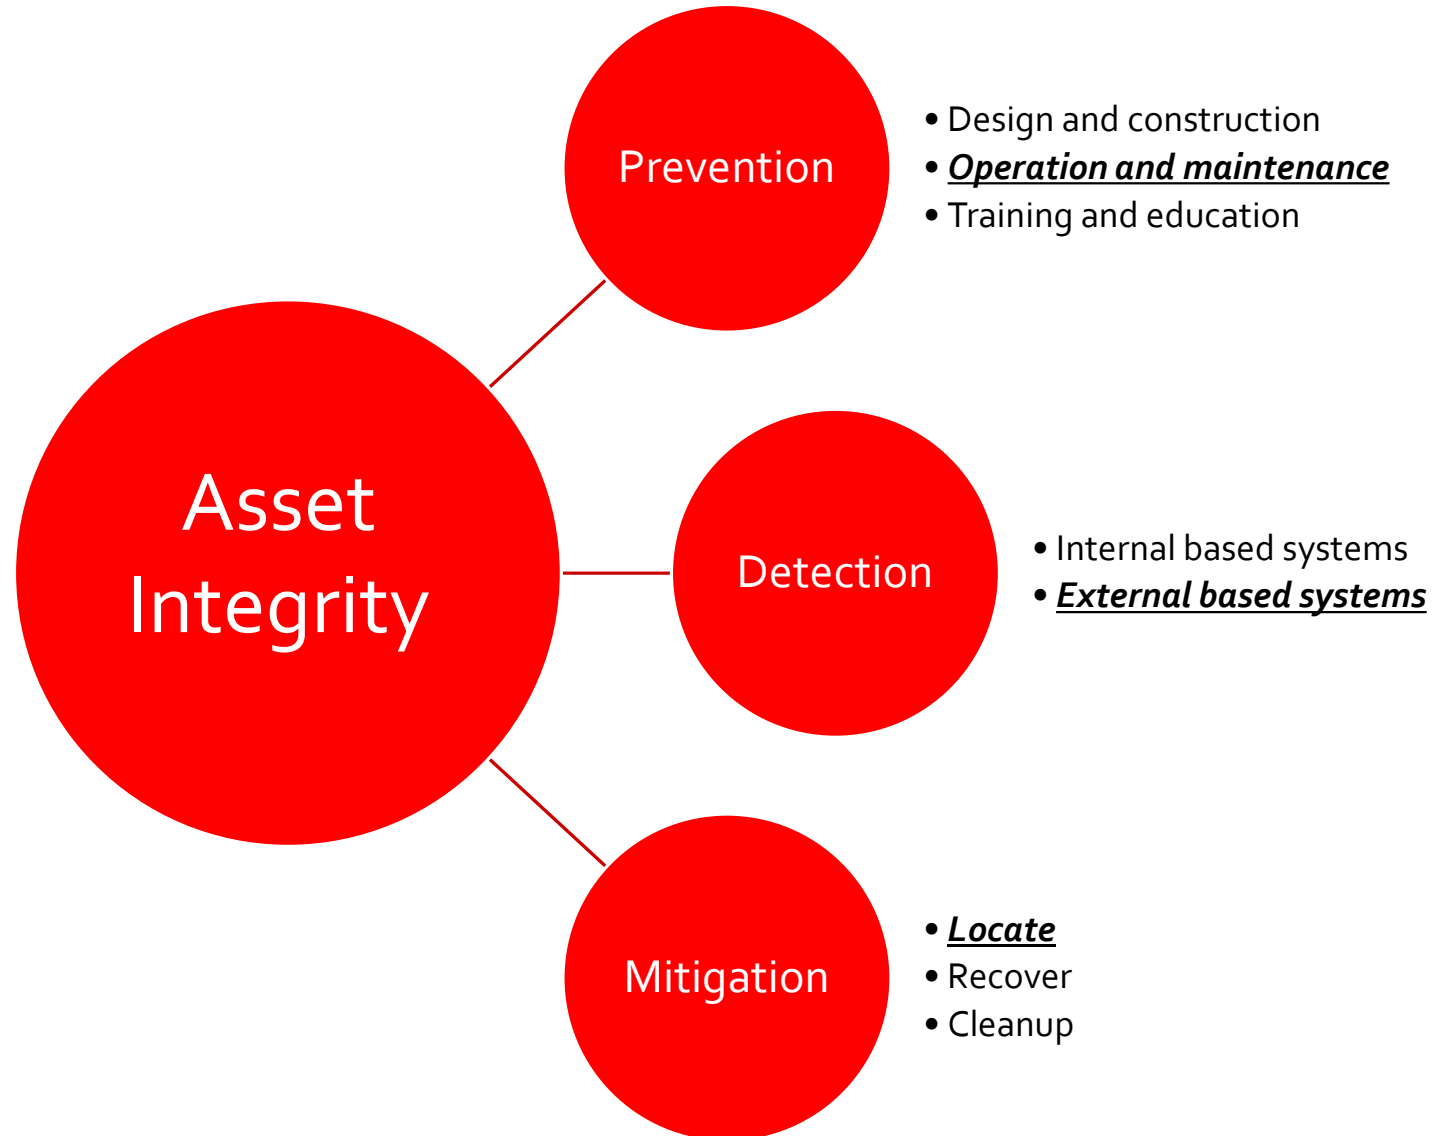

- Commercial use of drones illegal **UNLESS:**
 - Granted a “Section 333” exemption
 - Received a Certificate of Authorization (COA) for each flight
 - Operated by a pilot with an FAA issued airman certificate
 - Pilot’s license is a requirement, currently no specific UAV training
 - Operated by a two man team
 - Pilot in command (PIC)
 - Visual observer (VO)
 - Less than 400’ AGL
 - Within visual line of sight of PIC

Technology and Applications

Every operator's goal is improved safety with increased savings...

Technology and Applications

- Pipeline Patrol
 - Image analysis
 - Threat detection
 - Gas leak detection
- Cathodic Protection
- Vertical Structure Inspection
- Offshore Inspections
- Mapping
- Data Analytics

Pipeline Patrol – Image Analysis

- Vegetation health
- Soil erosion
- Encroachments
- Deviations from reference
- “Threats”

Pipeline Patrol – Image Analysis

- Vegetation health
- Soil erosion
- Encroachments
- Deviations from reference
- “Threats”

Pipeline Patrol – Image Analysis

- Vegetation health
- Soil erosion
- Encroachments
- Deviations from reference
- “Threats”

Pipeline Patrol – Image Analysis

- Vegetation health
- Soil erosion
- Encroachments
- Deviations
- “Threats”

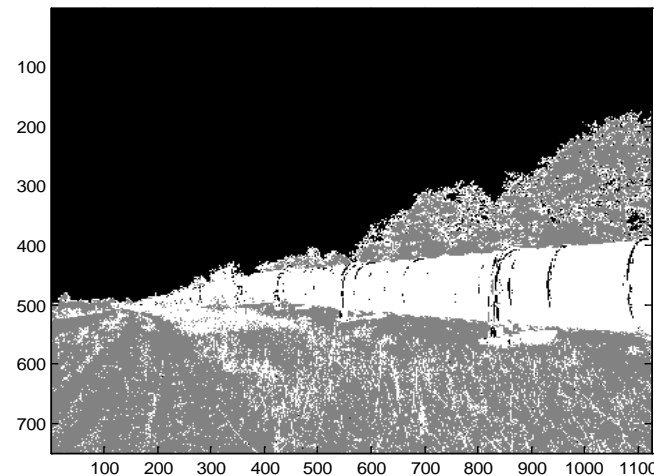

Pipeline Patrol – Image Analysis

- Vegetation health
- Soil erosion
- Encroachments
- Deviations
- “Threats”

Segmented image using k-means

Application of a low-pass filter

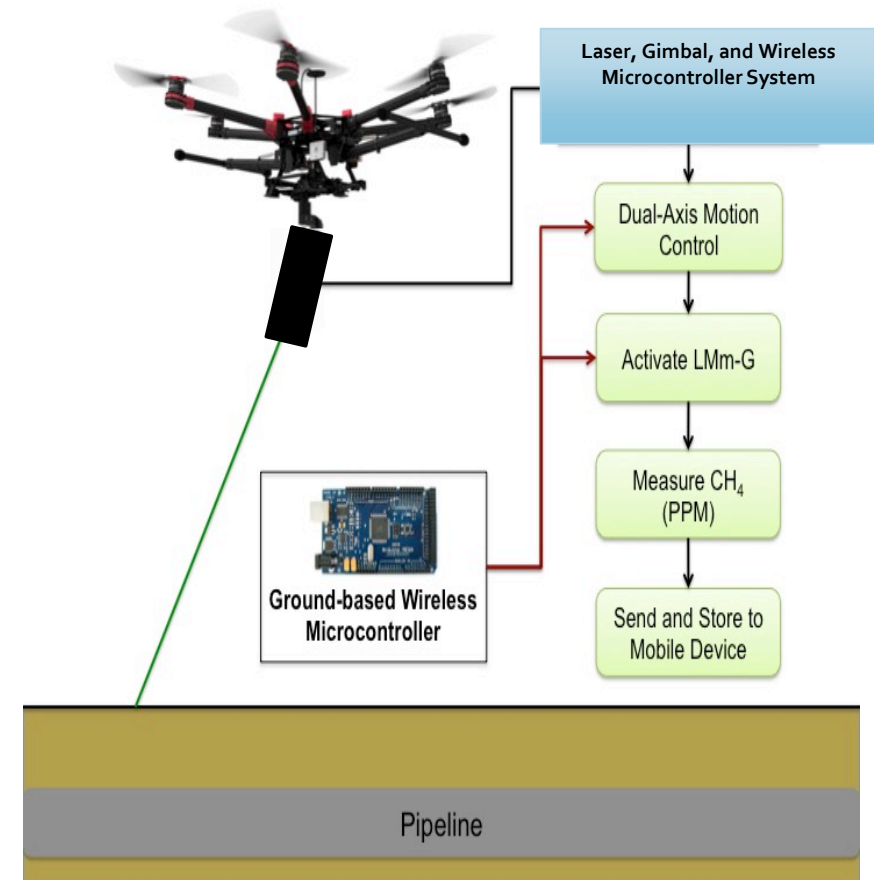

Gas Detection

- Diff Absorption Laser
- IR Cameras

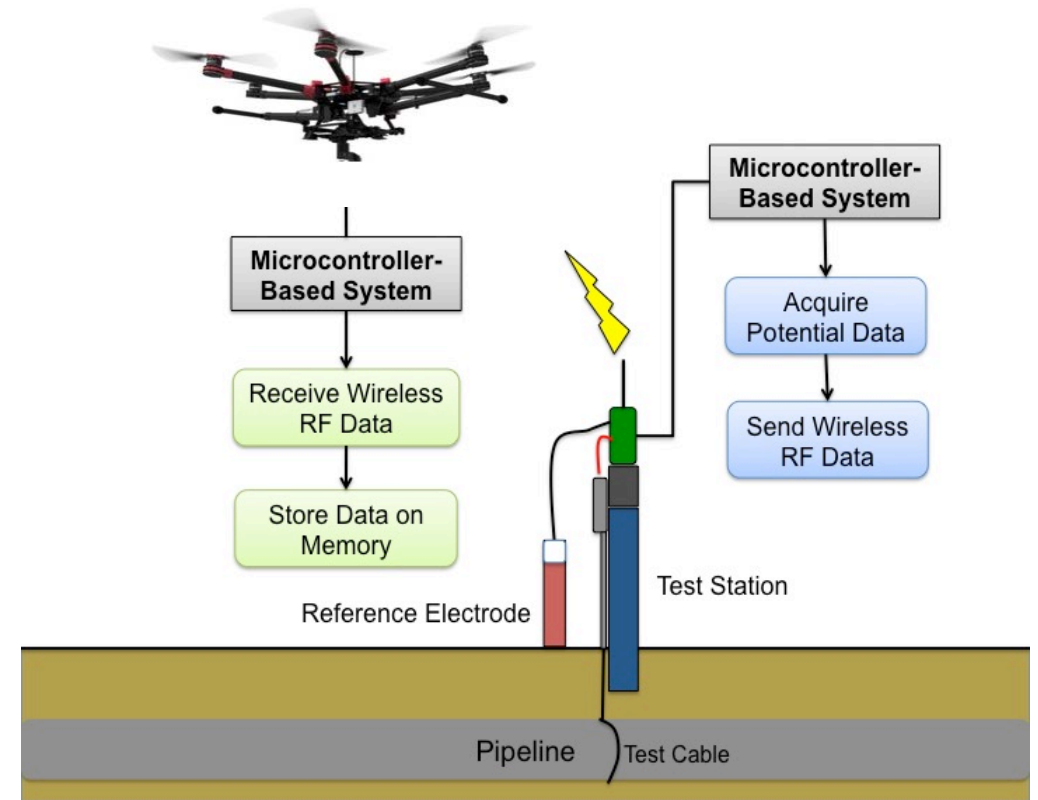

Gas Detection

- Diff Absorption Laser
- IR Cameras

Cathodic Protection Data Collection

- Wireless transmission processing unit
- Recorded pipe-to-soil voltage readings

Structure Inspection

- Visual Inspection
- 3D digitizing
- Orthomosaics
- Identify hot spots
- Measurement accuracy

Mapping & Modeling

- 3D, 2D
- Topographic
- Spill Modeling

Mapping & Modeling

- 3D, 2D
- Topographic
- Spill Modeling

Current Challenges

We Are Here

Flight Time, Payload, and Distance

- Flight Time
 - Battery Powered – 10-18 minutes
 - Gas Powered – 2 Hours +
- Payload
 - Multicopter – 15 lbs
 - Fixed Wing – 5 lbs
 - Hybrid Multicopter – 20 lbs
- Distance
 - FAA regulations
 - Line of Sight Communications

Data Analytics

- Why Big Data?
 - Information from traditional sources
 - Information from new sources
 - Increased frequency
- Applications
 - Equipment maintenance
 - Production optimization
 - Safety and compliance
- Volumes of data increasing by a factor of 5 each year¹
- Highest big data priorities²:
 - Develop near real time analytics – 62%
 - Expand data storage – 58%
 - Analyze increasing unstructured data – 53%
- Expected challenges to big data²
 - Managing data growth – 49%
 - Integrating disparate business tools – 41%

2. Microsoft. "Global Enterprise Big Data Trends: 2013." September 2012.

Data Analytics

- Apply predictive analytics to big data
- Empirical methods of data mining also used to avoid conditions where pipeline corrosion accelerates
- Real time data leading to prediction provide environment to increase support for safety

- Case Study - One meter, four variables

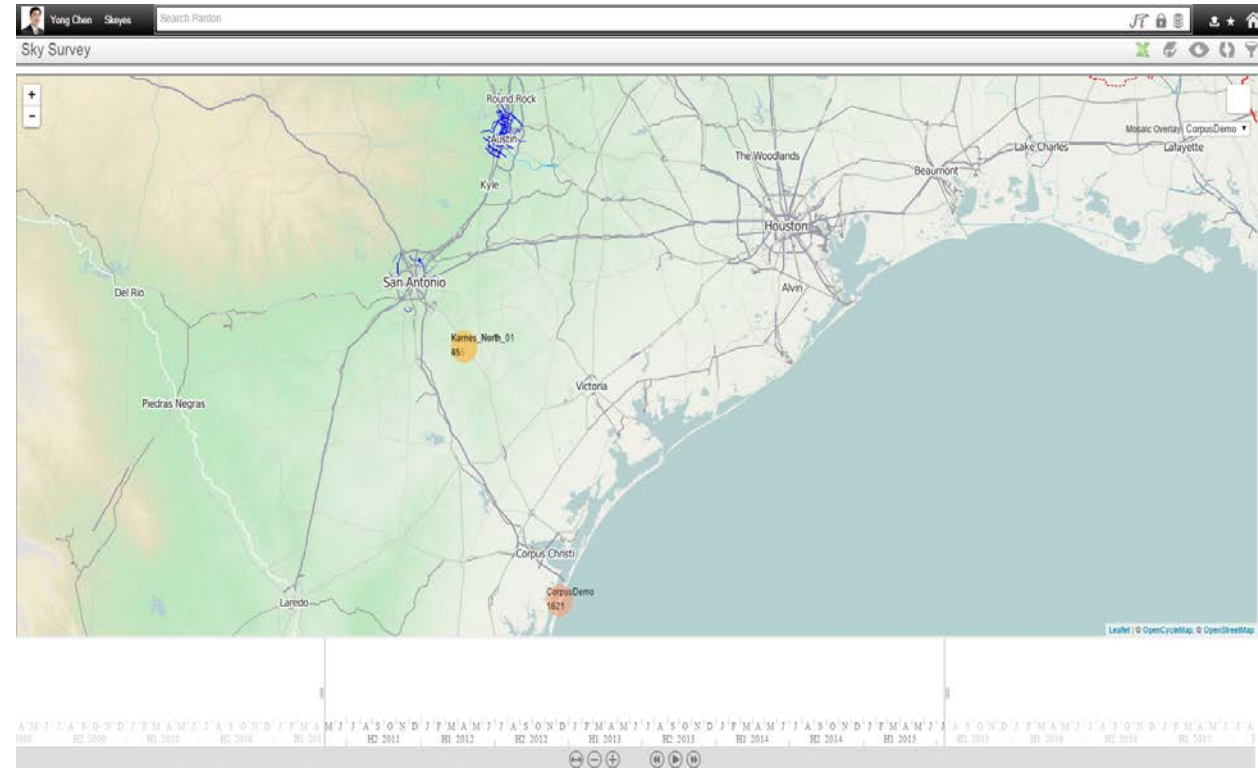

- Pressure differential
- Energy rate
- Flow rate
- Static pressure

- 100% on medium alert signals
- 57% on high alert signals
 - 100% precision

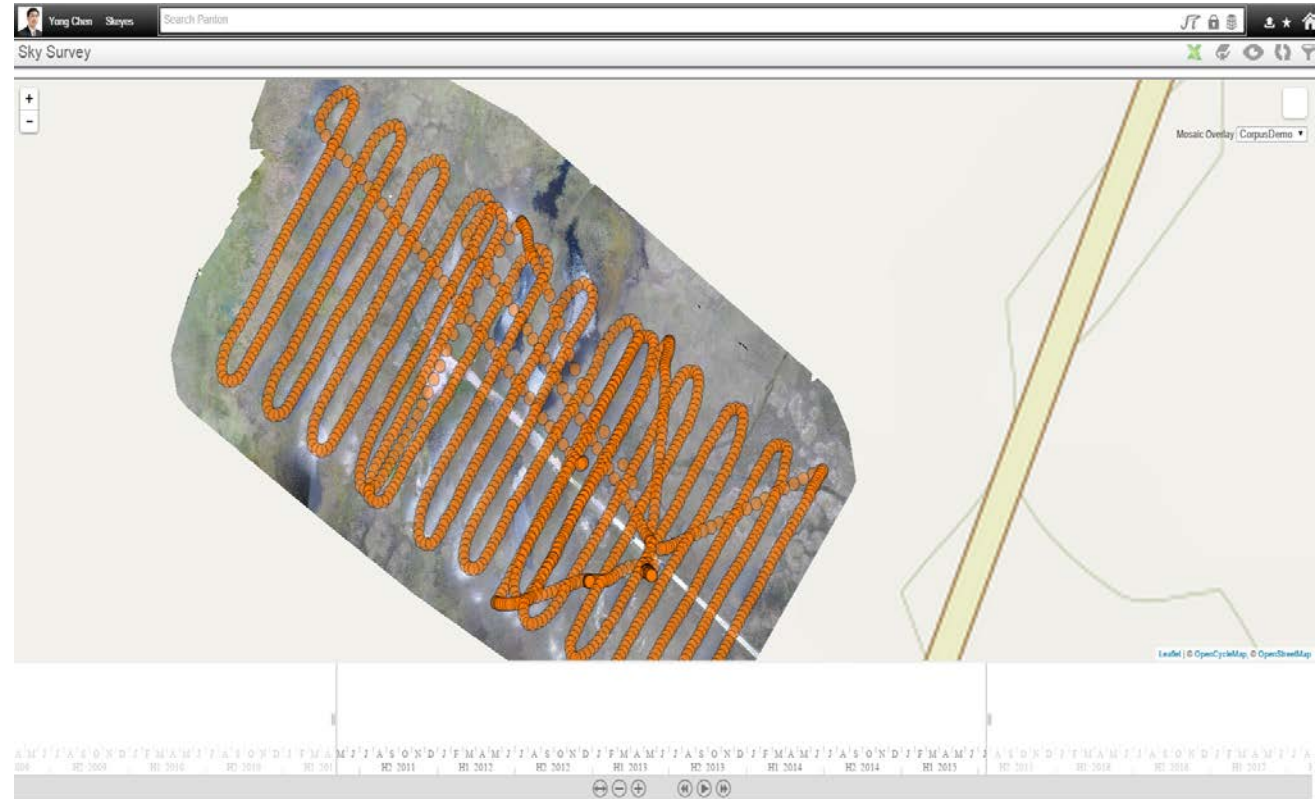

Data Analytics

- Business Intelligence
 - Use tools to find, select, and explore data in flexible ways
- Data storage and management
 - Capture and enable analysis of data
 - Server or cloud-based

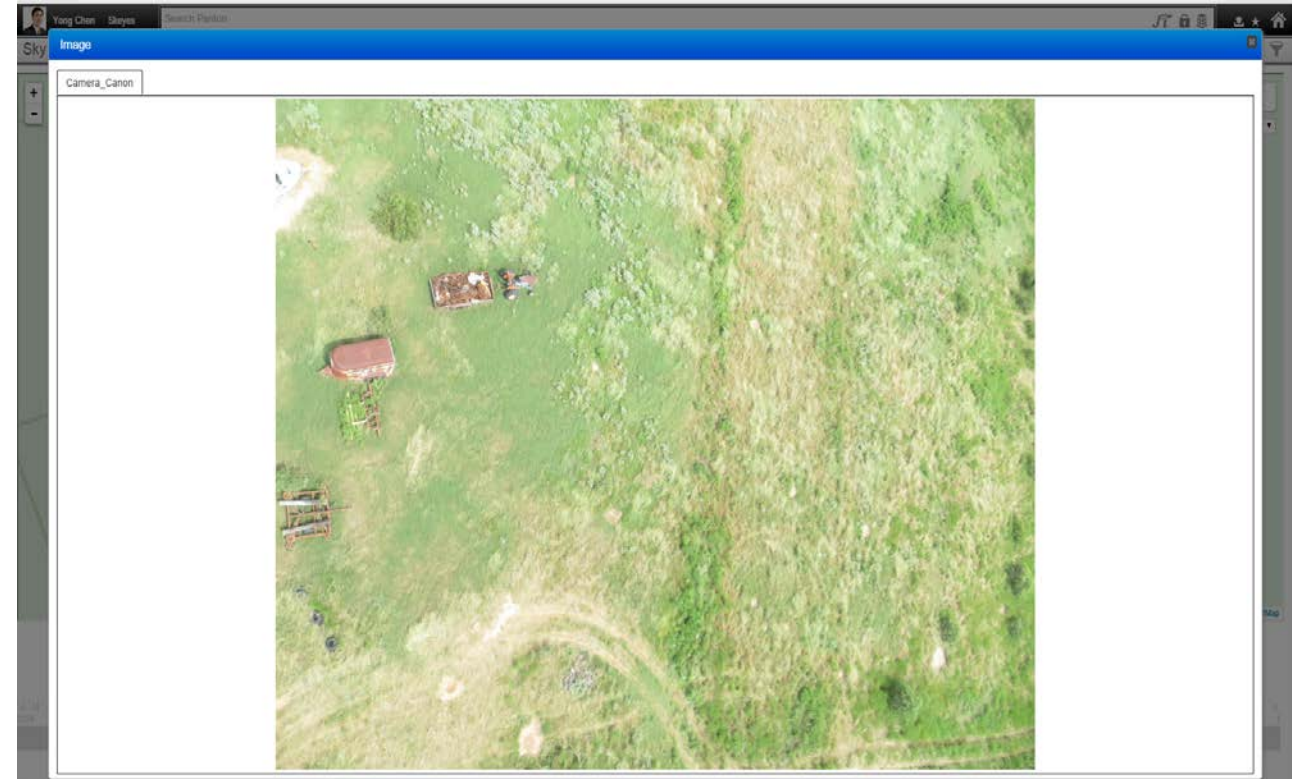

Data Analytics

- Business Intelligence
 - Use tools to find, select, and explore data in flexible ways
- Data storage and management
 - Capture and enable analysis of data
 - Server or cloud-based

Data Analytics

- Business Intelligence
 - Use tools to find, select, and explore data in flexible ways
- Data storage and management
 - Capture and enable analysis of data
 - Server or cloud-based

Summary

TODAY

- Patrol
- Vertical structure and facilities inspections
- Gas detection
- Video imaging
- Mapping
- Pre-construction survey
- Phase 1 environmental survey

TOMORROW

- Data analysis platform
 - Searchable user interface
 - Map-based
 - Timeline oriented
- Automated image analysis and threat detection
 - Class location
 - HCAs
- CP data collection
